Keywords: Chinese program; Theory; Logic.

Abstract. The "Chinese Solution" is a theoretical and practical experience of the road, theory and system of socialism with Chinese characteristics in the new era. It reflects the value orientation of Chinese development and shows the world the historic mission and responsibility of assuming responsibility as a responsible big country. The "China Program" is a complete system. This paper focuses on the historical logic, theoretical logic and practical logic of "Chinese Program" from a philosophical point of view.

Introduction

The report of the 19th National Congress of the Communist Party of China pointed out: "The continuous development of the road, theory, system and culture of socialism with Chinese characteristics has broadened the path for developing countries to modernization. It has given all the countries in the world who hope to speed up development and hope to maintain their independence, and has contributed China's wisdom and China's solution to the human problem. "The" Chinese Plan "is a symbol of the full maturity of the socialist road, theoretical system and system of the Chinese characteristics. It is also an opportunity for the Chinese Communist Party in the era of Marxism in China. The theory innovation and practice innovation in the field of globalization and globalization have described the bright prospect of world peace and development and are the most advanced social system programs in the world today.

Organization of the Text

Contributing to Mankind is the Historical Logic of "Chinese Proposal"

In March 2014, at the invitation of the Koeln-Basement Foundation, Xi Jinping mentioned for the first time in Berlin a speech entitled "China's Solution." The "China Plan" is both a comprehensive summary of the socialist road with Chinese characteristics, theoretical systems and systems, and a program provided for the development of human society. It is also the mission and responsibility of the Chinese Communist Party.

The Chinese Communist Party has always made its contribution to the contribution of mankind as its own mission. At the beginning of the founding of the party, Mao Zedong talked about the mission of the Chinese Communist Party as contributing to mankind. In the early days of the People's Republic of China, Mao Zedong said: "China is a big country with a quarter of the world's population, but its contribution to mankind is not in line with its population[1]." On many occasions, Deng Xiaoping said that the mission of the Chinese Communist Party is to make greater contributions to mankind. Deng Xiaoping believes that to get rid of poverty in a very large country is itself a contribution to the world. China has also developed and contributed to world peace. "Every step of China's development is to add a force to world peace. We have not only developed ourselves to improve the lives of our own people, but also our contribution to the entire international peace, that is, China's contribution to mankind[2]."

Since the 18th CPC National Congress, Xi Jinping has elaborated on many occasions the "China Plan" on different occasions and pointed out that the Chinese proposal has made China's contribution to the challenges that humankind has to face the 21st century. In March 2014, Xi
Jinping put forward in his speech at the Kolb Foundation in Germany: "China will" proceed from
the general interest of world peace and development and contribute to the wisdom of China in
handling contemporary international relations and contribute to improving China's global
governance. Meeting Our Challenges in the 21st Century[3]. "In July 2014, when accepting a joint
media interview with Latin American countries and four countries, he also pointed out: We will
propose more China programs to contribute to China's wisdom and provide more public goods to
the international community. In his "1 July" speech in 2016, Xi Jinping pointed out: "The Chinese
communists and Chinese people are fully confident of providing China with a solution to the
exploration of a better social system for mankind." The 19-party report profoundly expounds
socialism with Chinese characteristics entering the great significance of the new era in the history of
the People's Republic of China's development, the history of the Chinese nation, the history of
world socialism and the history of human society, the "three meanings" summarizes the significance
of the China proposal for national rejuvenation, socialism and human development contribution.
The "China Program" has put forward solutions to the universal problems facing mankind.

In short, the Chinese program has its own historical logic that no matter what historical position
China's social development is in, whether at the periphery of the world system or at the center of
the international arena, the Chinese Communist Party has always kept China's development in close
contact with the development of mankind together, make greater contribution to mankind as a
relentless pursuit of historical mission and responsibility.

The Law of Building Socialism with Chinese Characteristics is the Theoretical Logic of
"Chinese Proposal"

The theoretical logic of "China's proposal" is essentially the theoretical logic of socialism with
Chinese characteristics, that is, the inherent logic of the road, theoretical system and system in the
development of socialism with Chinese characteristics.

Socialism with Chinese characteristics consists of roads, theoretical systems and institutions. The
19th National Congress of the Communist Party of China pointed out that the road to socialism with
Chinese characteristics is "under the leadership of the CPC and based on its basic national
conditions, centering on economic construction, adhere to the four cardinal principles, adhere to the
principles of reform and opening up, liberate and develop social productive forces and build a
socialist market economy, socialist democracy, advanced socialist culture, socialist harmonious
society and socialist ecological civilization so as to promote the all-round development of people
and gradually realize the common prosperity of all the people and the building of a prosperous,
strong, democratic, civilized and harmonious socialist modern nation. "It embodies a
foothold. The basic national conditions and the essential requirements of upholding the party's basic
line reflect the value goal of promoting the all-round development of the people and gradually
realizing the common prosperity of all the people and building a prosperous, strong, democratic,
civilized and harmonious socialist modern nation. The system of socialism with Chinese
characteristics "is the fundamental political system of people's congresses, the system of multi-party
coopolation and political consultation under the leadership of the CPC, the system of regional
ethnic autonomy and the system of grassroots self-government, the socialist legal system with
Chinese characteristics, As the main body, the basic economic system for the common development
of various ownership-based economy and the specific systems of economic system, political
system, cultural system and social system based on these systems. " It marks that the Chinese
Communist Party has formed a set of standardized system of systems in various fields such as
economy, politics and society.

The internal relations of the theoretical logic of socialism with Chinese characteristics are
manifested in the following points: Firstly, from the road, the road to socialism with Chinese
characteristics is an important way to establish and develop the theoretical system of socialism with
Chinese characteristics and to uphold and perfect the socialist system with Chinese characteristics.
The road to socialism with Chinese characteristics has been pioneered by the leadership of the
Chinese Communist Party for a long time and explored. At the beginning of the founding of New
China, the victory of the new-democratic revolution led by the Chinese people led by Mao Zedong and the establishment of the socialist system as well as the initial practice of socialist construction laid the foundation for the formation of this road. Secondly, from the theoretical system, the theoretical system of socialism with Chinese characteristics is the guide for our party's actions in opening up and upholding the socialist road with Chinese characteristics and further improving the system of socialism with Chinese characteristics. Thirdly, institutionally, the socialist system with Chinese characteristics is the fundamental guarantee for upholding the road of socialism with Chinese characteristics and for perfecting and developing the theoretical system of socialism with Chinese characteristics. The formation of a socialist system with Chinese characteristics undoubtedly came from the great practice of the Chinese Communist Party in leading the people of all ethnic groups across the country to the path of building socialism with Chinese characteristics. The perfection and development of the theoretical system of socialism with Chinese characteristics should be based on the socialist system with Chinese characteristics. Without this carrier, the theoretical system of socialism with Chinese characteristics will lose its significance. The road of socialism with Chinese characteristics and the theoretical system, the internal unity of the three systems.

Building Socialism with Chinese Characteristics is the Practical Logic of the "Chinese Proposal"

Xi Jinping pointed out explicitly in the 19th CPC National Congress report: "After a long period of endeavor, socialism with Chinese characteristics has entered a new era and this is a new historical position for our country's development." The establishment of a new historical position for our country is a timepiece for Xi Jinping's new era in China. The creation of distinctive socialism provides an objective basis and realistic requirements. The theme of upholding and developing socialism with Chinese characteristics has different manifestations in different historical stages. At the beginning of the reform and opening up, this theme showed as follows: "What is socialism and how to build socialism?" Then, after that, "the construction of a certain party and how to build the party," "what kind of development and how can we develop" Other theme forms. Why is the theme of socialism with Chinese characteristics entering a new era, persisting in and developing socialism with Chinese characteristics? The report of the 19th National Congress of the CPC pointed out: "Both the domestic and international situation and the development of various undertakings in our country have given us a major issue of the times. This means that we must systematically answer the question of what kind of Chinese characteristics the new era should adhere to and develop from a combination of theory and practice. Socialism, how to uphold and develop socialism with Chinese characteristics. "Obviously," what kind of socialism with Chinese characteristics in the new era should we adhere to and develop socialism with Chinese characteristics "means that we should adhere to and develop the theme of socialism with Chinese characteristics, specific forms under the conditions of new times.

Xi Jinping's thinking on socialism with Chinese characteristics in the new era is based on the theme of "what kind of socialism with Chinese characteristics in the new era will it uphold and develop and how to uphold and develop socialism with Chinese characteristics." It is the theme of this major era profoundly revealed and scientifically answered. In the new era of Xi Jinping's socialism with Chinese characteristics, the "eight clear" and fourteen basic strategies have different focuses, but they only reveal and answer only one theme. In the era of Xi Jinping's socialism with Chinese characteristics, the "eight clear" themes of the world era have revealed and answered the question of "what kind of socialism with Chinese characteristics should adhere to and develop in the new era." Among the 14 basic strategies, the emphasis is on revealing and answering the questions of the times how to uphold and develop socialism with Chinese characteristics in the new era. It is a concrete deployment of this era issue at the action program level and belongs to the basic content of the methodological level. It is precisely these contents that have made clear to us a new era in the process of adhering to and developing socialism with Chinese characteristics. Our country's economy, politics, the rule of law, science and technology, culture, education, livelihood, ethnic group, religion, society, ecological civilization, national security, national defense and the specific
The guiding principle for the practice of socialism with Chinese characteristics in the new era is the socialism ideology of Xi Jinping with Chinese characteristics in the new era. The logic of the system consists of the main contradictions, the pursuit of value, the overall layout and the impetus for development. Firstly, taking the main contradictions in the primary stage of socialism as Logical starting point. Xi's new era of socialism with Chinese characteristics is the logical starting point for the construction of the main contradictions in the primary stage of socialism. Since the 18th CPC National Congress, the building of socialism with Chinese characteristics has entered a new era. The major contradiction in the new era is "the contradiction between the ever-growing need for a better life for the people and the uneven development of imbalance." This is based on the conditions of the new era., The new scientific judgment made by the state of our nation and the overall situation of the strategy is a historic change in the overall situation of the entire Chinese nation and a logical starting point for our party in carrying out theoretical innovation, making scientific decisions and doing a good job in all its work. Secondly, the pursuit of the highest values of the people. The report of the 19th National Congress of the CPC pointed out: "The people are the creators of history and the fundamental force that determines the future and destiny of the party and the country." Socialist construction with Chinese characteristics must adhere to the people as the center and rely on the people to create the great cause of history. The people are the fundamental force in promoting historical development. This is the fundamental point of view of Marxist historical materialism. Thirdly, take the "five in one" overall layout and "four comprehensive" strategic layout as the practice orientation. Since the eighteenth of the party, in the face of the new situation and new tasks, Xi Jinping has integrated the theoretical logic of scientific socialism with the historical and practical logic of the reform and construction of China's revolution and established Xi Jinping's socialism with Chinese characteristics in the new era. He proposed " four comprehensive "strategic layouts, established the" five major development concepts ", promoted the overall development of the" five in one "and further deepened our party's understanding of the" three major laws, "further enriched the practice of socialism with Chinese characteristics Features, Theoretical Features, National Features, Characteristics of the Times. Fourthly, take the overall deepening of reform as the basic driving force. Since the 18th CPC National Congress, Xi Jinping pointed out that "reform and opening up are the key measures for deciding the fate of contemporary China and the key move for deciding to realize the goal of" two hundred and 100 years of endeavor and realize the great rejuvenation of the Chinese nation. "In the new era of Xi Jinping, the socialist ideology with Chinese characteristics highlighted the fundamental impetus of deepening the overall reform. After the 18th CPC National Congress launched more than 1,500 reform measures, breakthroughs were made in the reform of key areas and key links. The main framework of the reform was basically established. The system of socialism with Chinese characteristics has been further improved, the level of modernization of the state administration system and governance capacity has been markedly enhanced, and the vitality and innovation of the whole society have been markedly enhanced.
